

Lessard-Sams Outdoor Heritage Council

DNR Grasslands - Phase IX Laws of Minnesota 2017 Final Report

General Information

Date: 11/04/2022

Project Title: DNR Grasslands - Phase IX

Funds Recommended: \$3,950,000

Legislative Citation: ML 2017, Ch. 91, Art. 1, Sec. 2, subd. 2(i)

Appropriation Language: \$3,950,000 in the first year is to the commissioner of natural resources to accelerate the restoration and enhancement of prairies, grasslands, and savannas on wildlife management areas, scientific and natural areas, Native Prairie Bank land, bluff prairies on State Forest land in southeastern Minnesota, and United States Fish and Wildlife Service waterfowl production area and refuge lands. A list of proposed land restorations and enhancements must be provided as part of the required accomplishment plan.

Manager Information

Manager's Name: Greg Hoch

Title: Prairie Habitat Team Supervisor

Organization: DNR

Address: 500 Lafayette Rd **City:** St Paul, MN 55155

Email: greg.hoch@state.mn.us Office Number: 651-259-5230 Mobile Number: 651-259-5230

Fax Number: Website:

Location Information

County Location(s): Clearwater, Beltrami, Todd, Morrison, Wabasha, Benton, Olmsted, Winona, Houston, Lac qui Parle, Aitkin, Stearns, Lincoln, Kandiyohi, Meeker, Chippewa, Nobles, Wilkin, Clay, Goodhue, Cottonwood, Redwood, Big Stone, Lyon, Washington, Murray, Grant, Red Lake, Kittson, Polk, Fillmore, Mahnomen, Yellow Medicine, Roseau, Anoka, Carlton, Carver, Chisago, Dakota, Isanti, Mille Lacs, Mower, Rice, Scott, Wright, Becker, Blue Earth, Douglas, Hennepin, Jackson, Le Sueur, Marshall, McLeod, Norman, Otter Tail, Pope, Renville, Rock, Sherburne, Sibley, Stevens, Swift and Traverse.

Eco regions in which work will take place:

- Northern Forest
- Forest / Prairie Transition

- Prairie
- Metro / Urban
- Southeast Forest

Activity types:

- Restore
- Enhance

Priority resources addressed by activity:

Prairie

Narrative

Summary of Accomplishments

We restored and enhanced a total of 40,539 grassland acres with 446 activities on Wildlife Management Areas, Scientific and Natural Areas, Native Prairie Bank easements, Waterfowl Production Areas, and National Wildlife Refuges.

Process & Methods

We select projects using a number of criteria and reviews to make sure the DNR and our federal partners, the USFWS, were spending these funds in the best and most productive ways. We can summarize our results in the following table.

Brome conversion 76

Interseeding 51

Grassland restoration 1,191
Prescribed Fire 36,079
Herbaceous Invasive Control 1,503

Goat Browsing - woody removal 281

Woody Removal 1,358

TOTAL 40,539

This appropriation involved the Southeast Roving Crews. These Crews allow the DNR to be very flexible. While they have a list of projects to work on, they can also respond fairly quickly if there's an enhancement opportunity shows up. For instance, a short dry period in a part of the state may allow them to conduct a late summer prescribed fire which was not in any of the original work plans. Roving Crews have begun experimenting with different burn seasons. The DNR will be hosting a workshop later this fall to discuss the science and management behind seasonal burns so that all staff and partners can continue to learn new applications for old tools.

This appropriation included a partnership with the USFWS. They were able to bring in 'detailers', federal crews from outside MN to dramatically enhance their capacity and ability to enhance wildlife habitat on WPAs and Refuges. The final acres reported here are reduced from our recent Status Updates. In further conversations with the USFWS, we calculated the number of detailers, number of in-state fire staff, and pro-rated the acres to account for this ratio.

We were also able to experiment with goat browsing in the SE to control buckthorn. SNA staff will monitor these sites over the coming years. This may provide a way to reduce chemical use and integrate some new and emerging agricultural practices, goats, into habitat management for the benefit of wildlife and the agricultural economy.

The DNR has traditionally focused on game species such as pheasants. However, there is more and more interest in pollinators and biodiversity. Fortunately, just about every study out there shows that management and restoration for pollinators and songbirds often creates the best habitat for game species. Diverse, healthy, productive habitat is good for a wide range of species. These projects can also increase the amount of carbon absorbed and stored by the plants and soils on these sites.

As we continue to use these funds, costs for projects will probably increase. In the early years of these funds, we completed a number of simpler or easier projects, the low-hanging fruit. Now we are left with the larger and more challenging projects.

In our budget table, we prorated our budget for individual projects by the acres accomplished. Staff funding was combined into one value. Identifying funding for each position would be an accounting challenge.

How did the program address habitats of significant value for wildlife species of greatest conservation need, threatened or endangered species, and/or list targeted species?

Prairie habitats once covered one-third of the state but presently less than 2% remain. Native prairie, other grasslands that provides habitat for wildlife, and wetlands are key components of functional prairie landscapes that have the capacity to adapt to changing environmental conditions. While these appropriation only added 2,085 acres of grassland acres to the state through restoration, these funds enhanced a much larger area. Put in another fashion, we restored and enhanced 69.5 square miles with these funds. That's an area 8.3 by 8.3 miles in area. None of this work was targeted at a specific species of wildlife. We used that approach that diverse productive habitats benefit a wide variety of both game and non-game wildlife species as well as any threatened or endangered species. In our restorations, we use very diverse seed mixes. This is obviously beneficial for pollinators. However, all those insects also create a food base for a large number of wildlife species. The structural diversity all those plant species create in the habitat allow every species to find an ideal niche in the grass as well as accomodates different life history stages of wildlife.

How did the program use science-based targeting that leveraged or expanded corridors and complexes, reduced fragmentation, or protected areas in the MN County Biological Survey.

The Minnesota Prairie Conservation Plan, the Prairie Pothole Joint Venture, and other state, regional, and nationals plans help us be strategic and targeted with our work. While this appropriation doesn't necessarily build on the habitat land base in those plans, it makes the existing grassland habitat as productive as possible for a wide range of wildlife species.

Explain Partners, Supporters, & Opposition

For this appropriation, we were able to partner with the USFWS, combining their existing staff with out of state detailers to increase their capacity for prescribed fire on federal public lands in western Minnesota. The increasing use of livestock, both goats and cattle, will hopefully continue to build productive relationships with the agricultural community.

Exceptional challenges, expectations, failures, opportunities, or unique aspects of program

The primary challenge was finishing this appropriation during the Covid period. However there were also a number of opportunities. We continued to build relationships with small businesses and contractors throughout the rural part of the state. We of course plan to continue this effort. This shows that these enhancement dollars are good not only for wildlife habitat but also for local rural economies.

As we work with more contractors they become more and more familiar with what our goals and objectives are and how we like to do projects. They become more efficient and need less oversight as they become used to these types of projects.

What other fund may contribute to this program?

• N/A

What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended?

In many cases, these efforts 'reset the clock' for our habitat work, such as tree removal projects that get an area back to a grassland state or projects that increase plant diversity. Once we get a WMA or SNA to that state, typical management / enhancement activities such as prescribed fire should be able to maintain the area in a desired state. In other cases, we may hit a site multiple times with fire over a couple of years to again get the site to where periodic fires or other enhancements maintain the diversity and productivity of the site in the long term.

Direct Support Services

How did you determine which portions of the Direct Support Services of your shared support services is direct to this program?

We used the standard DNR calculator to determine this number.

Explain any budget challenges or successes:

We are usually able to spend almost the entire appropriation. This year we are returning more than usual. This is simply related to the slowdown during covid.

Total Revenue: \$0

Revenue Spent: \$0

Revenue Balance: \$0

Of the money disclosed above, what are the appropriate uses of the money:

- D. This is not applicable because the recipient is a state agency or department.
- E. This is not applicable as there was no revenue generated.

Target Lake/Stream/River Feet or Miles

Outcomes

Programs in forest-prairie transition region:

• Protected, restored, and enhanced nesting and migratory habitat for waterfowl, upland birds, and species of greatest conservation need ~ Although we will not be conducting any specific monitoring on these sites, they will be included in the long-term surveys we do such as the August Roadside Survey, Prairie Chicken Survey, waterfowl surveys, etc. They may also be included in federal or regional surveys such as the Breeding Bird Survey, Waterfowl Breeding Population Survey, and others.

Programs in metropolitan urbanizing region:

• Core areas protected with highly biologically diverse wetlands and plant communities, including native prairie, Big Woods, and oak savanna ~ Although we will not be conducting any specific monitoring on these sites, they will be included in the long-term surveys we do such as the August Roadside Survey, Prairie Chicken Survey, waterfowl surveys, etc. They may also be included in federal or regional surveys such as the Breeding Bird Survey, Waterfowl Breeding Population Survey, and others.

Programs in the northern forest region:

 Healthy populations of endangered, threatened, and special concern species as well as more common species ~ Although we will not be conducting any specific monitoring on these sites, they will be included in the long-term surveys we do such as the August Roadside Survey, Prairie Chicken Survey, waterfowl surveys, etc. They may also be included in federal or regional surveys such as the Breeding Bird Survey, Waterfowl Breeding Population Survey, and others.

Programs in prairie region:

• Improved condition of habitat on public lands ~ Although we will not be conducting any specific monitoring on these sites, they will be included in the long-term surveys we do such as the August Roadside Survey, Prairie Chicken Survey, waterfowl surveys, etc. They may also be included in federal or regional surveys such as the Breeding Bird Survey, Waterfowl Breeding Population Survey, and others.

Programs in southeast forest region:

 Healthier populations of endangered, threatened, and special concern species as well as more common species ~ Although we will not be conducting any specific monitoring on these sites, they will be included in the long-term surveys we do such as the August Roadside Survey, Prairie Chicken Survey, waterfowl surveys, etc. They may also be included in federal or regional surveys such as the Breeding Bird Survey, Waterfowl Breeding Population Survey, and others.
